

Firearm Deactivation & Safety Policy

All firearms displayed or used for any type of demonstration purposes must be deactivated by removal of the firing pin or other alteration so that they are rendered incapable of being fired.

Firearms will be inspected on **Friday, February 2nd, from 4pm–8pm**, and before the Show opens on **Saturday, February 3rd from 7am–9am**. Inspections can be performed earlier on Friday by scheduling an appointment at Exhibitor Registration. Please make every effort to have your firearms available for inspection during these times to avoid unnecessary delays in opening your exhibit.

Once a firearm has been certified deactivated, it will be banded through the trigger guard and may be displayed. No firearm may be displayed after the Show opens without a band. Firearms deemed to be capable of firing must be removed from the Exhibit Hall immediately.

Any firearm brought into the Show after the Firearms Inspection has taken place must go to the Show Office to schedule an inspection. The firearm cannot be displayed or handled and must remain in a locked case until it has been inspected and banded.

All firearms must be secured at night by either hiring overnight security or cable locked to the booth.

Note: Exceptions may be granted at NRA's discretion for particularly rare firearms or ammunition displayed in locked display cases or otherwise made inaccessible for the entire duration of the Show.
